

Applebee's Grill & Bar

Client Quality Restaurant Concepts	Property Type New Construction	Location Fultondale, Alabama	Completion 2009 to Present
--	--	--	--------------------------------------

Project Builders, Inc has been working with Applebee's franchisee, Quality Restaurant Concepts, since 2009. We have built multiple building types as the prototype changed from wood framed, to a CMU structure, and now to a hybrid steel and metal stud building. The projects were scattered across four states in the southeast. Through this relationship, we help QRC to establish preliminary site budgets for new land acquisition, negotiate new construction projects and are at their disposal from before the initial design phase to closeout and warranty completion.
